MOB No: +91 6395159293

Carrier Objective:

I have **1.8 years** of IT Experience in Development of web based Application and Service Oriented Architecture. Experience in Developing **REST (JAX-RS)** based Web Services including both Consumer/Client and Provider/Resource end Enterprise Application Development. I have technically sound and ever-ready attitude, proficient interpersonal and decision-making skills.

Profile Summary:

- Experienced in developing interactive web based applications using **Spring IOC, Spring ORM, Spring MVC and Spring JDBC, Spring Transaction and Spring Boot, MicroService**
- Developed Resource using **(JAX-RS) REST** based Restful Services.
- Proficient in JavaSE, JavaEE, **Spring, Hibernate, JPA**, Web Services, **Spring Rest, SpringBoot Kafka, SpringCamel**
- Hands of knowledge in **Angular6 (Full Stack)**.
- Good knowledge of **Servlets, JSP, JDBC**.
- Hands of knowledge **Web Services(XML, JAX-WS, JAX-RS)**
- Strong knowledge in **implementing Object Oriented Concept OOPs, Collections and Exception handling in Java**.
- Having good experience on Tools (**GIT, Maven, Log 4j, Jira, Swagger**).
- Good knowledge of Design Pattern as like- **Singleton, DAO, Front Controller**
- Good knowledge of **Post Man**.
- Excellent Communication, Analytical, Interpersonal and Presentation skills.
- Good Team Player and Self-Motivated.
- Strong Debugging and Problem solving skills.

Education Qualification:

- ❖ BCA(Bachelor of Computer Application)

Professionals Experience:

- | | | |
|----------------|----|-----------------------------------|
| ❖ Organization | :- | Vengai Software Solutions Pvt Ltd |
| ❖ Designation | :- | Trainee Engineer |
| ❖ Period | :- | jun 2018 to Current Month |
| ❖ Location | :- | Hyderabad, Telangana . |

Technical Skills:

Programming Language	Java
Java Technologies	Java SE, Java EE
Web Technology	HTML, CSS, XML, Servlets, JSP, JSTL
Distributed Technologies	JAX-WS, JAX-RS
Application Framework	Spring ,SpringBoot(Core, MVC, JDBC,ORM), Angular
ORM Framework	Hibernate, JPA
Application Servers	JBOSS, Web Logic
Databases	Oracle, MySql
Tools	Maven, JIRA, Spring tool Suite, My Eclipse, Eclipse, SqlDeveloper, Visual Studio Code
Design Pattern	Singleton, MVC, Front Controller, DTO,DAO

Project#1

Project Summary:

Project: Redemption Reward Point Management System

Team size: 6

Role: Java Developer

Project Description:

Redemption reward point's management system project is implemented for a customer benefits. The main objective of this project is to develop a information for Flight, Hotel and mobile recharge through which customer can book the Flight, Hotel and can make a mobile recharge for his own rewards point. For this first customer login into Net banking or directly on official website, to search flight by providing source, destination & journey date, then this application will provides list of flights details. Customer will choose anyone of the flight, apply payments using amount (or) using point, and book a ticket. Users can find rewards links of same sites based on the content user is searching. This will help users to easily navigate to the website for reference with short time span. In order to increase customer we provide rewards point system in which if user reaches 100 rewards points he can use these points to book Flight, Hotel and can make a recharge on his own interest from the online market.

Roles & Responsibility:

- Implementing a provider using Spring rest.
- Responsible for implementing the business logic in service layer.
- Developing User defined Exceptions for each request and Response.
- Using Spring ORM, Integrating between spring boot and JPA,
- Development and Design promo code and its validation.
- Coordinating with team for peer review and implement the business logic
- Involved in developing/Enhancing the code based on the client requirement.

➤ Environment:

- ❖ Java, Eclipse, Web logic Server, Web Services (SpringBoot, Rest), JSON, Log4J, Maven
