PROJECT EXPERIENCE

• Android App for Library Management System

1 month

This system uses SQL database to store information of books. The connectivity between app and database is done by PHP. User need to sign in into app and must register for the book which needs to be issued. QR code is generated and it needs to scan from administrator or Librarian. Administrator doesn't have to keep a manual track of the users. The system excludes the use of paper work by managing all the records electronically.

- **Android App for Agro-Deal**

In Process

This System uses Firebase Database for login. News and Government New Schemes are introduced through app. Information about Organic farming and crops growing in particular soil and weather. This app mainly includes Auction System of crops where farmers can upload the quality of crops and Agent can buy the crops on best price. This uses the concept of Machine Learning. This app Also includes the shopping of pesticides and Agriculture product online.
