Technical Skills:

Languages : C, C++, Java, Manual, Automation, Selenium testing.

Web Technologies : HTML, PHP.

Operating Systems : Windows, Linux.

Database : MySQL, DBMS, RDBMS.

Projects:**Logging and Tracking Retail Maintenance Service for Furniture:-**

This project is a part of product development which is used for selling and buying furniture online from different vendors. This application has access to several vendors which allow them to sell their products. This is designed to track the details of each user and the items ordered. The system also stores the tracking details for improving the quality and functionality of the application and to generate the report for each vendor.

My Role in project was to write the queries for several scenarios using SQL commands and to manage the database.

Skills: SQL, PHP, Angular JS, Node JS, and JavaScript.

File Management and file Handling:-

Here we use handling different types of file. This is used to perform several operations on files like creating new files, searching, updating, deleting and appending in files. It is used for managing space over the system in efficient way.

Skills: C++, SQL and DBMS

Courier Management System:-

Here we use the online delivery system. We are checking for the shipment of products to customer. The customer can courier any items to any place cost will be calculated based on weight, mode used for transportation and the distance.

Skills: C++, HTML, DBMS

Other Activities:

- Published a paper on “Logging and Tracking Retail Maintenance Service for Furniture”.
- Participated in Android developing seminar.
